1 COMES NOW the United States, through Assistant United States
2 Attorney Stuart F. Pierson, and pursuant to the Pretrial
3 Schedule ordered in this case herewith submits its pretrial brief.
4

5 I

6 INTRODUCTION
7

8 A. Reason for this Suit.

9 This case was begun in September, 1970, upon the complaint
10 of the United States. Various parties have intervened on both
11 sides. It is safe to say that all parties share the expectation
12 that this decision in this case will comprehensively and under-
13 standably resolve issues that have been festering in this
14 district for many years. This is, of course, a high expectation,
15 especially in view of the recurrent nature of the Indian fishing
16 rights controversy through numerous other court decisions.
17 We feel, however, that the expectation is justified and will
18 be fulfilled in light of the extent and depth of preparation
19 and presentation of the various parties' positions.
20

21 B. Prior Proceedings.

22 In addition to the normal discovery and intervention
23 activities, several major pretrial proceedings have taken place
24 in this case. In February, 1972, plaintiffs applied for a
25 temporary restraining order and preliminary injunction against
26 the Game defendants regarding enforcement of their regulations
27 outside reservation boundaries on the Quillayute River. A
28 full hearing was had, after which the application was denied.
29
30
31

1 In January, 1973, the Game defendants moved for summary
2 judgment and plaintiffs reiterated their motion to strike
3 affirmative defenses. A full hearing was had; the defendants'
4 motion was denied and plaintiffs' motion was taken under advise-
5 ment. In June and July, upon special order, the Game defendants
6 moved to dismiss or to delay judgment. Responses have been
7 filed and the motion is now pending.

8 Through these prior proceedings, the legal positions and
9 arguments of the plaintiffs and the Game defendants have
10 become fairly clear. The legal position of the Fisheries
11 defendant, while not yet extensively briefed, has been recently
12 described by Thor C. Tollefson, Director of the Department
13 of Fisheries:

14
15 Q. Does the Department of Fisheries have a policy for Indian
16 fishing at usual and accustomed stations off reservations?

17 A. Yes.

18 Q. Please describe that policy, including when and under
19 what circumstances it originated.

20 Q. Following our interpretation of several court cases
21 involving Indian treaty fishing rights, including the
22 Puyallup cases in the U.S. Supreme Court and Washington
23 State Supreme Court, and the Sohappy case in the U.S.
24 District Court for Oregon, we have taken the view that
25 Indians have a special right not enjoyed by others to
26 fish at their usual and accustomed fishing places off
27 their reservations. We also take the view under those
28 same court decisions that the Department of Fisheries
29 may regulate such off-reservation fishing and that our
30
31

1 regulations must be reasonable and necessary for
2 conservation and meet appropriate standards. With that
3 as a policy, we have provided off-reservation fishing
4 time and opportunity to Indian tribes.

5 Q. Are you familiar with the term "fair share" or "fair and
6 equitable share" as they relate to Indian treaty fishing?

7 A. Yes.

8 Q. What is your understanding of those terms?

9 A. Those terms were used in connection with the Judge Belloni
10 decision in the Sohappy case. The states of Oregon and
11 Washington jointly manage the Columbia River salmon
12 stocks under a federally-approved compact. Both states
13 have had difficulty in determining exactly what the terms
14 mean. Endeavoring to carry out the court's decision to the
15 best of our ability, we have provided the Indians (who
16 fish above Bonneville Dam) equal or greater time and
17 opportunity to fish than we have provided for the non-
18 Indians who fish below the dam. We have also made certain
19 that sufficient fish get over the dam to (1) take care of
20 escapement for spawning requirements, and (2) provide fish
21 for the Indians to meet the fair and equitable share
22 requirements.

23 Q. Under your administration has the Department of Fisheries
24 attempted to provide Indians, fishing under treaty rights,
25 with a fair and equitable share of the harvest of salmon
26 originating in streams upon which there is located an
27 Indian fishery in the area of this case?
28
29
30
31

1 A. Yes, on the rivers and marine areas listed in Appendix II
2 of the Joint Biological Statement we have set special
3 treaty Indian fishing seasons and have attempted to insure
4 that the seasons were set so as to give the Indians an
5 opportunity to fish at times when there are significant
6 numbers of fish in their fishery.

7 Q. What difficulties does the department face in attempting
8 to provide the Indians with a fair and equitable share of
9 the harvest for salmon?

10 A. In the Puget Sound area there are a number of Indian tribes
11 which fish. There are a number of streams, each of which
12 has its own runs of salmon. Also, there are several state
13 hatcheries located on different streams which produce a
14 great number of juvenile salmon. Mature salmon return to
15 the streams of their birth or to the hatcheries which produced
16 them. Each species of salmon returns at the same general
17 time. Thus, they are intermingled when they enter the
18 Strait of Juan de Fuca or the waters of Puget Sound. While
19 they are intermingled it is impossible to restrict fishing
20 on salmon from one particular stream or one particular
21 hatchery. If in order to protect salmon bound for one
22 stream we place an across the board restriction on fishing
23 on all the salmon while intermingled, we will have over-
24 escapement to other streams and large surpluses at
25 hatcheries on rivers where there is no Indian fishery.
26 Such a practice would be wasteful and definitely contrary
27 to the conservation of the resource.

28 Q. In your opinion is there a need for judicial clarification
29 of the terms "reasonable and necessary for conservation"
30 and "meeting appropriate standards" as well as "fair share"
31 or "fair and equitable share?"

1 A. Yes. These terms sound fine in principle but in practice
2 they they are too vague to give us any standard by which we can
3 determine how to manage the fishery in such a way that
4 the Indian fishermen have an opportunity to catch their
5 fair share of the harvest. All of our regulations which
6 restrict the amount of time and impose gear limitations,
7 such as net size, are reasonable and necessary for
8 conservation. When you have two or more groups of
9 fishermen fishing on the same runs of salmon at different
10 times, any regulation of one group is interrelated with
11 the regulation of the other group. Regulation of one
12 group is as much a conservation necessity as regulation
13 of the other group. If we had an objective standard
14 by which we could measure the Indian share, the tests
15 of "reasonable and necessary for conservation" and "fair
16 share" would be more meaningful.

17
18 Written direct testimony of Thor C. Tollefson, pp. 2-5.

19 It would be unnecessary and unduly time consuming to
20 attempt in this pretrial brief to set forth extensively the
21 legal arguments which the United States presents in this case.
22 A comprehensive post-trial brief will fulfill this function
23 best in light of an established factual record. This brief
24 will be directed, therefore, toward a description of the
25 basic elements of proof which the United States anticipates
26 presenting at trial, a summary of the legal basis for the
27 presentation of such proof and a summary of the relief we
28 seek.

1 C. Outline of the Position of the United States.

2 The United States has brought this action on its own
3 behalf as a party to the treaties involved and as a trust
4 guardian of Indian tribes, and on behalf of selected Indian
5 tribes 1/ in western Washington for whom it has a trust
6 responsibility. The United States asserts that each of those
7 tribes holds a reserved right to fish outside reservation
8 boundaries. These rights were secured in treaties with those
9 tribes or their predecessors and are linked to the marine
10 and freshwater locations where they fished during treaty times.

11 Since each tribe's right is a special, reserved right,
12 it is unlike the privilege of non-Indians to fish under State
13 law. It is federally protected under the supreme law of the
14 land; and it must, therefore, be given treatment by the State
15 independent of State regulation of fishing by non-Indians.

16 These treaty fishing rights may not be qualified by any
17 State action; for they do not derive from, or depend upon,
18 State authority or power. The State's authority to regulate
19 these rights is limited to an appropriate exercise of its police
20 power. That is, it may impose and enforce such regulations
21 only if, in doing so, (a) it does not discriminate against
22 the tribes' special rights, (b) its regulations meet appropriate
23 standards, and (c) it has shown those regulations to be
24 reasonable and necessary for conservation of the resource.
25 Before imposing any restriction on the tribes' exercise of
26 these treaty fishing rights, the State defendants must: deal
27 with the matter of those rights as a subject separate and
28

29 1/ The selection of the seven tribes named in the United States
30 complaint (Puyallup, Muckleshoot, Nisqually, Skokomish, Makah,
31 Quileute and Hoh) is not meant to indicate a determination that
only those tribes hold the rights asserted. There are other
western Washington tribes which also hold such treaty fishing
rights.

1 distinct from that of fishing by others; so regulate the
2 taking of fish that the tribes and their members will be
3 accorded an opportunity to take, at their usual and accustomed
4 places by reasonable means feasible to them, a fair and
5 equitable share of all fish which the defendants permit to
6 be taken from any given run; and establish that their regula-
7 tions are the least restrictive which can be imposed consistent
8 with assuring the necessary escapement of fish to conserve
9 the run involved.

10 The United States contends that the Game defendants have
11 unlawfully qualified the tribes' treaty rights by wholly
12 refusing to recognize those rights. By this fact and facts
13 of individual conduct, they have discriminated against the
14 tribes' rights. By their refusal to recognize those rights and
15 by other conduct, the Game defendants have ignored and violated
16 appropriate standards; and, by their refusal to recognize those
17 rights and their attempt to set steelhead apart as a species
18 not subject to the tribes' harvest, they have failed to show
19 their regulations reasonable and necessary for conservation.

20 The United States contends that, while the Fisheries defendant
21 has recognized that some of the plaintiff tribes hold special
22 treaty rights to fish outside reservation boundaries, its
23 regulations unlawfully qualify the tribes' rights, in that
24 (a) they fail to recognize that the right is in the nature of
25 a reservation which may be understood only by reference to
26 the present and future needs of the tribes; (b) they fail to
27 recognize that the tribes' usual and accustomed fishing places
28 are far more extensive than those currently in use; and
29 (c) they fail to recognize that a scheme of equitable
30
31

1 appportionment of the harvestable resource would not accord
2 the tribes' the full respect and protection due their treaty
3 fishing rights.

4 The United States contends that the State defendant has
5 unlawfully qualified the tribes' treaty fishing rights
6 in the enactment of legislation which authorizes or
7 directs the Departments of Game and Fisheries, or other State
8 agencies, to act unlawfully in dealing with either the tribes'
9 rights or the resource from which they are entitled to take.

11 II

12 OUTLINE OF EXPECTED PROOF

13 The Supreme Court has on numerous occasions noted that
14 while the courts cannot vary the plain language of an
Indian treaty, such treaties are to be construed:

15 as 'that unlettered people' understood it,
16 and, 'as justice and reason demand in all
17 cases where power is exerted by the strong
18 over those to whom they owe care and
19 protection,' and counterpoise the inequality
20 'by the superior justice which looks only to
21 the substance of the right, without regard
22 to technical rules,' Choctaw Nation v.
23 United States, 119 U.S. 1, 7 Sup.Ct. 75, 30
24 L.Ed. 306; Jones v. Meehan, 175 U.S. 1, 20
25 Sup.Ct. 1, 44 L.Ed. 49.' United States v.
26 Winans, supra. [198 U.S. 371, 49 L.Ed. 1089,
27 25 Sup.Ct.Rep. 662]
28 Northern Pacific Railway Co. v. United States,
29 227 U.S. 355, 366, 33 S.Ct. 368, 57 L.Ed. 544
30 (1913)

31 It is our responsibility to see that the terms
32 of the treaty are carried out, so far as
possible, in accordance with the meaning they
were understood to have by the tribal repre-
sentatives at the council and in a spirit
which generously recognizes the full obliga-
tion of this nation to protect the interests
of a dependent people.

Tulee v. Washington, 315 U.S. 681, 684,
62 S.Ct. 862, 86 L.Ed. 1115 (1942).

33 *Sohappy v. Smith*, 302 F.Supp. 899, 905 (D. Ore. 1969).

1 The United States proof in this case will be in four basic
2 areas. Although it is not necessarily reflected in the order of
3 proof, the logical order of the presentation of the United States'
4 proof in these areas will be:

5 1. Proof describing the meaning and anticipated affect of
6 the treaty language at issue in this case; such proof will depend
7 primarily upon testimony of anthropological experts.

8 2. Proof describing the current policies, practices
9 and pattern of State regulations affecting Indians fishing
10 pursuant to their claimed treaty rights; this proof will depend
11 primarily upon agreed biological facts, testimony of State
12 officials and testimony of Indian witnesses.

13 3. Proof describing alternatives to current State
14 regulations which promise to provide treaty Indians a greater
15 share of the harvestable resource; such proof will be based
16 primarily on the testimony of State officials, agreed biological
17 testimony, testimony of Indian witnesses and testimony of a
18 biological expert of the Bureau of Sport Fisheries and Wildlife.

19 4. The United States and counsel for the various plaintiff
20 tribes will present Indian witnesses who will describe, among
21 other things, their current fishing practices and the effects
22 of State regulations thereon.

1 A. Admitted Facts.

2 Many of the facts in this case have been admitted, either
3 through stipulations in the pretrial order or by answers to
4 requests for admissions. The Final Pretrial Order and the
5 responses the requests for admissions set forth those facts at
6 length. In addition to the stipulated facts stated in the
7 pretrial order, the plaintiffs will offer specific factual
8 admissions taken from the responses to their requests for
9 admissions. We do not propose to repeat those admitted facts
10 or our other proof in detail here. It should be sufficient here
11 simply to outline the nature of our anticipated proof.
12

13 B. Indian Life Around Treaty Times.

14 Through admitted facts and anthropological testimony, we
15 will show that the Indian groups, whose treaty rights are held
16 by the plaintiff tribes, fished extensively for anadromous fish
17 (salmon and what is now classified steelhead trout), before,
18 during and after treaty times. These Indians depended primarily
19 on such fishing and were concerned to retain their fishing
20 rights as non-Indians began settling in western Washington.
21
22
23
24
25
26
27
28
29
30
31

1 The treaty Indians specific places of fishing varied, by run,
2 by season, by year, by water condition and by choice. The
3 various bands were used to and accustomed to fishing broad
4 areas of marine and freshwater. Although there are extensive
5 records and oral history from which many specific fishing
6 locations can be pinpointed, it is impossible to compile a
7 complete inventory of any tribe's usual and accustomed grounds
8 and stations. Such an inventory is possible only by designating
9 entire water systems. There are four principal reasons why any
10 list of usual and accustomed fishing places for treaty Indians
11 is necessarily incomplete:

12 1. Fishing stations which were also the sites of
13 weirs and permanent villages are more easily documented through
14 archaeological evidence, historical records, and ethnographic
15 studies than are riffles where fish were speared. The nature of
16 gear used has tended to influence the recording of sites.

17 2. Indian fishermen, like all fishermen, shifted to
18 those locales which seemed most productive at any given time.
19 The productivity of local sites varied with (1) volume of water
20 in a stream at a particular season of year, (2) amount of mud
21 or silt present at a given time, and (3) alteration in the
22 water course due to flooding, log jams, and other natural
23 causes. The use of particular sites varied over time. There
24 were traditional fishing locations which were used for as long
25 as people could remember, but these were not fixed and unchanging
26 because the water courses themselves were not immutable or
27 unalterable.

28 3. A number of important fishing sites recorded in
29 treaty times are no longer extant because of post-treaty manmade
30 alterations in the watershed. Diversion of water for power
31 purposes has lowered the carrying power of some streams and

1 dried up others; engineering for flood control has altered
2 the course of rivers; canal-cutting has lowered lake levels; and
3 land fill operations have obliterated still other fishing stations.
4 When sites are demolished, their existence is eventually
5 forgotten.

6 4. Other fishing sites are still extant, but are no
7 longer used by Indian fishermen because the appropriate Indian
8 gear for those particular sites has been outlawed or because
9 competing users, not necessarily fishermen, have made utilization
10 of these sites by Indian fishermen infeasible. In still other
11 instances extant usual and accustomed sites are no longer fished
12 because the species taken in treaty times have been destroyed by
13 post-treaty events. Alteration of water temperature and water
14 level, industrial pollution, and the fencing of spawning creeks
15 by private land owners are some of the causes. When use of these
16 sites are discontinued, their former importance is gradually
17 forgotten.

18 Furthermore, documentation as to which Indians used
19 specific fishing sites is incomplete. Many fisheries can be
20 documented in the historical record for which user groups are
21 unspecified. Conversely, mention of user groups, where it occurs,
22 is not necessarily complete or exclusive. George Gibbs, a
23 central figure in the drafting, signing and implementation of
24 the treaties, was drawing on information gathered during treaty
25 times, when he said in 1877:

26 As regards the fisheries, they are held in common,
27 and no tribe pretends to claim from another or from
28 individuals, seigniorage for the right of taking.
29 In fact, such a claim would be inconvenient to all
30 parties, as the Indians move about, on the sound
31 particularly, from one to another locality, according
32 to the season.

1 The fishing areas used by treaty Indians whose rights are
2 held by the plaintiff tribes were basically of five kinds:
3 (1) freshwater lakes; (2) freshwater streams and creeks draining
4 into the various inlets; (3) shallow bays and estuaries;
5 (4) the inlets and the Sound; and (5) the straits and ocean.

6 Customary use rights varied according to the type of locale
7 and the gear being used. Winter villages were located along the
8 fishing streams, at the heads of inlets near the mouths of such
9 streams, and on protected coves and bays. The major requirements
10 in the location of winter villages were shelter from the elements
11 and from surprise attack, suitable beach or bank for launching
12 canoes and for storing them above high water mark, and access to
13 firewood, freshwater, and fishing stations.

14 The larger and more important villages were usually located
15 at particularly lucrative fishing places: at the forks of a
16 river where weirs could be set up; at the outlet of a river
17 into a lake; and at the heads of inlets near the mouths of the
18 salmon streams. Other large villages were located on the
19 saltwater in protected coves and bays.

20 During the winter season, if people went out for fresh
21 food stores, they used the fishing areas in closest proximity to
22 their villages. During the spring, summer, and fall, people
23 moved about to fish at more distant fishing grounds.

24 In general, the freshwater fisheries were controlled by
25 the locally resident population. During the winter season,
26 the local residents were the exclusive users. At other
27 seasons use rights at these locations and others within the
28 territory of a particular group would be extended to visitors
29 from other localities.

1 Visitors from beyond the immediate locality would arrive
2 to take advantage of particular runs not available in their
3 streams or not running at that particular time in their locality.
4 Certain of these visitors would have use rights because they
5 were related to local residents. Others might request permission
6 to fish and such permission was normally extended if amicable
7 relations existed between the local people and the visitors.

8 The situation with regard to saltwater fisheries appears
9 to have been slightly more complicated. Shallow bays where
10 salmon, flounder, and other fish were speared were often gathering
11 places for people from a wider area. This was especially true
12 if shellfish beds were present. In the deeper waters of the
13 bays, huge flotillas of canoes would gather to troll for the
14 fish as they gathered in the bays just prior to their entry
15 into the rivers.

16 Meeker (1905:64) offers a firsthand account of fishing
17 activities at the end of May or early June in 1853:

18 As we drew off on the tide from the mouth of
19 the Puyallup River, numerous parties of Indians
20 were in sight, some trolling for salmon, with a lone
21 Indian in the bow of his canoe, others with a pole
with barbs on two sides fishing for smelt, and
used in place of a paddle, while again, others with
nets, all leisurely pursuing their calling, . . .

22 People living upriver on a given drainage system would normally
23 come to the saltwater areas at the mouth of the river to obtain
24 fish and shellfish. At some of the major fishing locations people
25 from other drainage systems would also congregate to join in
26 the fishing.

27 The deeper saltwater areas, the Sound, the straits, and the
28 open sea, served as public thoroughfares, and as such, were
29 used as fishing areas by anyone travelling through such waters.

1 Private property rights to saltwater fisheries were recognized
2 reefnet locations in the straits. With the Lummi reefnet
3 locations, individuals owned specific locations on the reef
4 which they received by heirship. Owners of locations then hired
5 relatives and friends to work with them in preparing the
6 gear and fishing the site.

7 The nature of "rights" varied from individual inheritance
8 of privately owned sites to shared access to specific trolling
9 areas. Such rights were respected by Indians who did not share
10 them. The latter might ask permission to use specific locations
11 and/or gear and this would usually be granted. Trespass was
12 rare and usually led to friction.

13 Indian control of fishing was by accepted, customary modes
14 of conduct rather than by formal regulations involving enforcement
15 and sanctions. With regard to anadromous fish, it was necessary
16 that the first fish from the run be treated ritually.

17 Controls over fishing were necessary in cooperative
18 efforts which required coordination by someone who organized and
19 directed the group effort. The construction of a weir was
20 usually a cooperative effort, a number of men working under the
21 direction of a leader. The entire community usually had access
22 to the weir, the leader regulating the order of use and the
23 times at which the weir was opened to allow upstream escapement
24 for spawning and/or supply of upriver fishermen.

25 Techniques such as spearing or trolling in saltwater
26 which involved individual effort were not regulated or controlled
27 by anyone else.

28 Generally, individual Indians had primary use rights to
29 locations in the territory which they resided and secondary use
30 rights in the natal territory (if this was different) or in
31

1 territory where they had consanguineal kin. Subject to such
2 individual claims most groups claimed exclusive fall fishing
3 rights in the waters near to their winter villages. Spring and
4 summer fishing areas were often more distantly located and often
5 were shared with other groups.

6
7 C. Negotiating and Signing the Treaties.

8 During the negotiations of the treaties the Indian leaders
9 expressed concern over their right to continue to resort to their
10 fishing places. They were reluctant to sign the treaties until
11 given assurances that they could continue to go to such places
12 and take fish and game there. The records of the treaty
13 negotiations reflect this concern and also the assurances given
14 to the Indians on this point as inducement for their acceptance
15 of the treaties. The Indians had also received assurances
16 from other non-Indians that they would be compensated for lands
17 which were being settled on and for loss or destruction of
18 native property incident to non-Indian settlement. The Indians
19 were concerned that these things be done by mutual agreement.

20 The United States was concerned to extinguish Indian title
21 to the land in Washington Territory legally, in order to forestall
22 friction between Indians and settlers and between settlers and
23 the government. The Act creating Oregon Territory provided
24 that Indian land title should be extinguished by treaties.
25 Before Indian title had been extinguished, the Donation Act
26 threw open land to settlement and induced non-Indians to migrate
27 and take up land claims. Until treaties were concluded and
28 reservations were established, it was impossible to enforce the
29 federal trade and intercourse laws regulating traffic in liquor
30 and commercial relations in Indian country.

1 There is no mention of restrictions as to purpose, time,
2 or method of taking either in the treaties themselves or in
3 the official records relating to treaty proceedings. No such
4 restrictions were indicated by the commissioners or contemplated
5 by the Indians. The treaty commissioners knew that fish were
6 important to the Indians, not only from the standpoint of their
7 food supply and culture but also as a significant element of
8 trade with the settlers. Both parties wanted these aspects to
9 continue -- the Indians in order to sustain their prosperity and
10 the government in order to promote the prosperity of the
11 Territory. Both parties intended the Indians to continue full
12 use of their fishing places, even though most lands adjacent to
13 fishing waters were ceded.

14 Generally, the Indian signatories to the treaties were
15 individuals who had some sort of friendly contact with non-
16 Indians. A few spoke Chinook jargon and probably most were men
17 of importance in their communities, although they were not
18 necessarily the most important men. The "head chiefs" and
19 "leading men" were selected by Simmons and Stevens, sometimes
20 with the aid of the "head chiefs". The grounds for choice were
21 friendliness to Americans, real or apparent status in their
22 communities, and ability to communicate in Chinook jargon.
23 The "sub-chiefs" and "leading men" were intended by the United
24 States to represent the bands to which they were thought to
25 belong. Various "bands" and "fragments of tribes" were arbitrarily
26 assigned a subordinate status to other "tribes", each
27 of which had been assigned a "head chief". The latter were
28 taken to represent not only the group to which they belonged,
29
30
31

1 but all other groups which had been declared subordinate to
2 it. The signatories, in the United States' view, had the
3 capacity to alienate land belonging to such groups. On the
4 Indian side, there was no precedent for signing legal documents,
5 nor was there any culturally sanctioned method of formally
6 alienating land.

7 It is hazardous to judge the extent of communication of
8 either specific terms or of underlying purposes and effect
9 without a transcript of the actual Chinook jargon used to interpret
10 the treaties. We have no knowledge that any Indian present at
11 any of the treaties understood English. It is a matter of record
12 that many, if not most of those present, did not even understand
13 Chinook jargon. The official interpreter, Shaw, spoke no
14 Indian language and had to use Chinook jargon to interpret the
15 treaties, which were then re-interpreted into the various
16 Indian languages by Indians who understood the jargon. This
17 double translation resulted in the Indians receiving the
18 information at third hand and increased the potential for
19 confusion.

20 Chinook jargon was a trade medium of limited vocabulary
21 and simple grammar. Both Indians and non-Indian witnesses to
22 the treaty negotiations have commented upon its adequacy to
23 express precisely the legal concepts embodied in the treaties.

24
25 D. State Law Affecting Indian Fishing.

26 The Game defendants and state statutes absolutely prohibit
27 taking steelhead by any other method than restricted angling,
28 and in doing so have set that species of fish apart for the
29 exclusive use and benefit of sport fishermen. In enforcing
30

1 those statutes; and its regulations, the Game defendants have
2 subjected members of the plaintiff tribes to arrest, prosecution,
3 trial, imprisonment, fine and confiscation, and to threats of
4 the same, despite the fact that those members were fishing
5 pursuant to their treaty right and despite the discriminatory
6 nature of the steelhead regulations which have not been shown
7 either necessary or reasonable to conserve the resource.

8 The Fisheries defendant, while attempting to reach an
9 accommodation through special regulations for Indian Fishing,
10 has consistently promulgated and enforced its regulations of
11 salmon harvesting upon an assertion of plenary power to regulate
12 treaty Indian harvest in the same manner as it regulates non-
13 Indian harvest. The result has been: Criminal prosecution and
14 the threat of prosecution, use by tribal members of many fewer
15 than all of their usual and accustomed fishing places, and a
16 share of the harvestable resource available to the plaintiff
17 tribes which is both inequitable and incommensurate with full
18 respect for their fishing rights reserved by treaty.

19 The State defendant has continued to follow a legislative
20 policy at odds with the plaintiff tribes' claimed treaty rights
21 and the supreme federal law which protects them. By permitting
22 the Game Department to take one position (denying the existence
23 of any distinct Indian treaty fishing rights) while the Fisheries
24 Department takes a clearly conflicting position (recognizing
25 special rights held by the tribes under treaty), the State has
26 contributed to tribal members' fear and confusion and to the
27 dismay which publicly exists.

1 E. Conservation Alternatives.

2 There are available to the Game defendants and to the
3 Fisheries defendant feasible alternative methods for regulating
4 harvest by non-Indians which promise to provide a greater share
5 of the harvestable fish to the plaintiff tribes. While (as with
6 current regulations) these alternatives are not absolutely
7 precise in their result, they would provide a sufficient volume
8 of the resource to fulfill the present and future needs of the
9 tribes.

10
11 F. Issues of Admissibility.

12 The United States anticipates interposing objections to
13 admissibility of portions of the written direct testimony of
14 the defendants' officers and witnesses, as noted on the face
15 of the exhibits in which that testimony is contained. As a
16 general matter, the following contentions have guided our inter-
17 position of those objections:

18 1. It is irrelevant to determining the nature and
19 extent of the plaintiff tribes' treaty fishing rights, or the
20 range of permissible State regulation thereof, (a) that some
21 fish are bred in hatcheries which are financed (in whole or
22 part) by sports or commercial fishermen, or (b) that sports
23 or commercial fishermen have spent certain amounts of money in
24 pursuit of their fishing effort, or (c) that sports or
25 commercial fishermen will spend less, or earn less, money if
26 the State were fully to respect the tribes' treaty rights, or
27 (d) that agents of the State distribute surplus hatchery fish
28 to some of the plaintiff tribes, or (3) that any portion of the
29 total volume of a run is taken outside the jurisdiction of the
30 State of Washington.

2. Defendants' witnesses are not competent to describe how, when or why members of the plaintiff tribes fish, absent specifically cited foundation.

3. Defendants' witnesses are not competent to interpret court decisions for the guidance of the Court.

4. Events and matters of significance must be confined and supported in terms of time, place, circumstances and persons involved.

5. Witnesses must be confined to their knowledge or expertise.

6. Statements of significance should be offered by the declarant.

III

SUMMARY OF APPLICABLE LAW

A. The Treaty Terms.

The language of Article III of the Treaty of Medicine Creek has been agreed upon as typical of the treaty provisions at issue in this case. That provision has six essential parts:

1. "The right . . .
2. "of taking fish, . . .
3. "at all usual and accustomed grounds and
stations, . . .
4. "is further secured . . .
5. "to said Indians, . . .
6. "in common with all citizens of the Territory,
. . ."

1 First, the treaty expressly provides that the Indians were
2 given a "right", notwithstanding the Game defendants' reliance
3 on non-analogous dicta in *Ward v. Race Horse*, 163 U.S. 504, 514
4 (1896). See *United States v. Winans*, 198 U.S. 371, 382-838
5 (1905).

6 Second, the right is one "of taking fish". There is nothing
7 in this provision to suggest that the right was to be confined to
8 a specific method of taking fish. While the treaty does not
9 guarantee the Indians a particular mode of fishing, it does
10 guarantee that, before the State can prohibit any type or manner
11 of taking, the prohibition must be justified on the standards set
12 forth in *Puyallup Tribe v. Department of Game*, 391 U.S. 392,
13 398 (1968).

14 Third, the Indians' right of taking fish is geographically
15 limited only by the extent of those places which were their
16 usual and accustomed fishing grounds and stations.

17 Fourth, the Indians' right was "secured", a term which
18 Webster's Third New International Dictionary defines as: "to
19 relieve from exposure to danger . . . to shield."

20 Fifth, the right of taking fish was secured to the
21 Indians alone. There is no express or implied attempt to secure
22 rights to non-Indians. Indeed, such a provision would be absurd
23 in a treaty between the United States and Indians, where the
24 Indians ceded all of their land and assets and the United States
25 reserved to them certain lands and rights to fish. The treaty
26 was an exchange of assets for solemn guarantees between the
27 two treating parties.

28 Sixth, the Indians' right was to be exercised in common
29 with the non-Indians of the area. That this part of the article
30 was meant merely as a description of how the Indians could expect
31 to exercise their reserved right has been emphasized by the
32 Supreme Court:

* * *

In *United States v. Winans*, 198 U.S. 371, this Court held that, despite the phrase "in common with citizens of the territory," Article III conferred upon the Yakimas continuing rights, beyond those which other citizens may enjoy, to fish at their 'usual and accustomed places' in the ceded area; and in *Seufert Bros. Co. v. United States*, 249 U.S. 194, a similar conclusion was reached even with respect to places outside the ceded area.

Tulee v. State of Washington, 315 U.S. 681, 684-685 (1942).

This holding was reaffirmed in *The Puyallup Tribe v. Department of Game*, 391 U.S. 392, 397 (1968). In determining how the Supreme Court's guidelines should be administered, the Washington Supreme Court has held:

(1) If a defendant proves that he is a member of [a treaty] tribe; and (2) he is fishing at one of the usual and accustomed fishing places of that tribe; (3) he cannot be restrained or enjoined from doing so, unless he is violating a statute or regulation of the Departments promulgated thereunder, which has been established to be reasonable and necessary for the conservation of the fishery.

Department of Game v. The Puyallup Tribe, 70 Wn.2d 245, 262 (1967), *aff'd*, 391 U.S. 392 (1968), *quoted at* 80 Wn.2d, at 561, 565 (1972). That court further held that the burden of proof to show that regulations are reasonable and necessary (when challenged by a treaty Indian fishing at a usual and accustomed place) rests with the State. The courts have advised that the limitations on the application of state police powers in regulation of treaty Indian fishing are more restrictive than those concerning the scope of the other police powers of the state. *Puyallup Tribe v. Department of Game*, 391 U.S. 392, 402, Note 14; *Holcomb v. Confederated Tribes of the Umatilla Reservation*, 382 F.2d 1013 (9th Cir. 1967); *Makah v. Schoettler*, 192 F.2d 224 (9th Cir. 1951); *Sohappy v. Smith*, 302 F.Supp. 899 (D.Ore. 1969).

Page 23 - PRETRIAL BRIEF

1 B. Leading Cases.

2 In *Tulee v. State of Washington*, *supra*, the Supreme Court
3 has advised:

4 It is our responsibility to see that the terms of the
5 treaty are carried out, so far as possible, in accord-
6 ance with the meaning they were understood to have by
7 the tribal representatives at the council, and in a
spirit which generously recognizes the full obligation
of this nation to protect the interests of a dependent
people.

8 315 U.S., at 684-685. Since *Tulee*, numerous courts have
9 expressly recognized the historical dependence of the Indian
10 parties to the Northwest treaties upon fishing for their
11 subsistence and livelihood. The United States District Court
12 in Oregon has found:

13 From the earliest known times, up to and beyond
14 the time of the treaties, the Indians comprising each
15 of the intervenor tribes were primarily a fishing,
16 hunting and gathering people dependent almost entirely
17 upon the natural animal and vegetative resources of
18 the region for their subsistence and culture. They
19 were heavily dependent upon such fish for their sub-
20 sistence and for trade with other tribes and later
21 with the settlers. They cured and dried large
quantities for year around use. With the advent of
canning technology in the latter half of the 19th
Century the commercial exploitation of the salmonid
resources by non-Indians increased tremendously.
Indians, fishing under their treaty-secured rights,
also participated in this expanded commercial fishery
and sold many fish to non-Indian packers and dealers.

22 *Sohappy v. Smith*, 302 F.Supp. 899, 906 (D. Ore. 1969). That
23 court then went on to hold that the State must apply the purposes
24 of the treaties to its current regulatory scheme as it affects
25 the exercise of the Indians' rights:

26 In determining what is an 'appropriate' regula-
27 tion one must consider the interests to be protected
28 or objective to be served. In the case of regulations
29 affecting Indian treaty fishing rights the protection
30 of the treaty right to take fish at the Indians'
usual and accustomed places must be an objective of
the state's regulatory policy coequal with the
conservation of fish runs for other users.

31 302 F.Supp., at 911.

32 Page 24 - PRETRIAL BRIEF

1 The Idaho Supreme Court has recently registered its
2 agreement with the need to recognize and to respect the purpose
3 underlying the reservation of the Indians' fishing rights:

4 The gathering of food from open lands and streams
5 constituted both the means of economic subsistence and
6 the foundation of a native culture. Reservation of the
7 right to gather food in this fashion protected the
8 Indians' right to maintain essential elements of their
9 way of life, as a complement to the life defined by
10 the permanent homes, allotted farm lands, compulsory
11 education, technical assistance and pecuniary rewards
12 offered in the treaty. Settlement of the west and
13 the rise of industrial America have significantly
14 circumscribed the opportunities of contemporary Indians
15 to hunt and fish for subsistence and to maintain tribal
16 traditions. But the mere passage of time has not eroded
17 the rights guaranteed by a solemn treaty that both sides
18 pledged on their honor to uphold. As part of its
19 conservation program, the State must extend full recog-
20 nition to these rights, and the purposes which underlie
21 them.

22 *State v. Tinno*, 94 Id. 759, 497 P.2d 1386, 1393 (1972).

23 See also *People v. Joindreau*, 384 Mich. 539, 185 N.W.2d 375
24 (1971); *State v. Gurnoe*, 39 Wis.2d 390, 192 N.W.2d 892 (1972).

25 In analyzing the purpose of the treaty provisions securing
26 the rights of salmon and shellfish harvesting, the Ninth Circuit
27 has observed:

28 [The Indian parties to the Treaty of Point No Point]
29 were concerned with possible loss of their sources
30 of food -- 'berries, deer and salmon'. The first
31 to speak said in part: 'I wish to speak my mind
32 as to selling the land. Great Chief' What shall
we eat if we do so? Our only food is berries,
deer and salmon -- where then shall we find these?
I don't want to sign away all my land, take half of
it, and let us keep the rest. I am afraid that I
shall become destitute and perish for want of food.'

After the Indians had been assured that the
reservation would only be a place at which they
must make their homes, the Indians discussed the
proposal among themselves and on the following
day assented to the treaty. At that time one of
the tribe said: 'My heart is good. I am happy
since I have heard the paper read and since I
have understood Gov. Stevens, particularly since
I have been told that I could look for food where
I pleased and not in one place only.

* * *

We are willing to go up the Canal since we know we can fish elsewhere. We shall only leave there to get salmon, and when done fishing will return to our houses.'

It is clear that the reservation was intended only as a residence, and the Indians were to remain free to roam and fish at their usual places.

Skokomish Indian Tribe v. France, 320 F.2d 205, 210 (9th Cir. 1963).

The plaintiff tribes' treaty fishing rights are reserved rights:

The right to resort to the fishing places in controversy was a part of larger rights possessed by the Indians, upon the exercise of which there was not a shadow of impediment, and which were not much less necessary to the existence of the Indians than the atmosphere they breathed.

* * *

... the treaty was not a grant of rights to the Indians, but a grant of rights from them, -- a reservation of those not granted.

* * *

Reservations were not of particular parcels of land; and could not be expressed in deeds, as dealings between private individuals. The reservations were in large areas of territory, and the negotiations were with the tribe. They reserved rights, however, to every individual Indian, as though described therein. There was an exclusive right of fishing reserved within certain boundaries. There was a right outside of those boundaries reserved 'in common with citizens of the territory.'

United States v. Winans, 198 U.S. 371, 381 (1905). The full measure of those treaty rights must be sufficient for the tribes' present and future needs. *Winters v. United States*, 207 U.S. 564 (1908); *Arizona v. California*, 373 U.S. 546, 596-601 (1963); *United States v. Ahtanum Irrigation District*, 236 F.2d 321 (9th Cir. 1956), cert. denied, 352 U.S. 988; 330 F.2d 897 (9th Cir. 1956); 338 F.2d 307 (9th Cir. 1964), cert. denied, 381 U.S. 924.

IV

SUMMARY OF RELIEF REQUESTED

A. Declaration of the Tribes' Rights.

As the first pillar of appropriate relief in this case, the United States seeks a declaration that each of the plaintiff tribes holds a distinct, special right to take fish, reserved to it under the applicable treaty. That right entitles the Tribes' members to take from the anadromous fish resource in the State of Washington a share which is equitable by comparison to the share taken by non-Indians and which is responsive to the tribe's present and future needs.

B. Injunction.

As the second pillar of relief, the United States seeks an affirmative and prohibitory, permanent injunction requiring the State, its agents and those acting in concert with them immediately to terminate their regulation of fishing by the plaintiff tribes outside reservation boundaries, until, by valid and appropriate procedures, they adopt regulations or enact statutes designed fully and fairly to respect and protect the tribes' treaty rights and to carry out the purposes of the treaties. At the least such actions must:

1. Provide the tribes an opportunity to take, by means feasible to them, a share of the resource which is both fair by comparison with the share available to other user groups and adequate to the tribes' needs;

2. Consider perpetuation and improvement of the size and reliability of the fish runs as the sole controlling objectives of regulation of Indian fishing;

1 3. Adopt regulations on an annual or seasonal basis
2 only upon specific supporting and current facts and data;

3 4. Enforce their regulations with due regard for
4 the person and property of Indian fishermen;

5 5. Consider as fundamental to their regulatory
6 choice the cultural and economic value of fish harvesting to
7 Indians;

8 6. Accept as prima facie proof of the tribes' needs,
9 the tribes' estimates thereof;

10 7. Adopt, as their own, tribal proposals for
11 regulation of the Indian fishery unless it can be shown that such
12 tribal proposals are wasteful or are inadequate for necessary
13 conservation of the specific run involved;

14 8. Protect off-reservation Indian fishing from
15 interference by non-Indians in those instances when the State's
16 regulation has limited the area of Indian fishing to less than
17 the full extent of the tribes' usual and accustomed fishing
18 places; and

19 9. Leave to the tribes in the first instance the
20 authorization and regulation of the off-reservation fishing of
21 their members. The first of such regulations shall be held
22 ineffective until reviewed and approved by this Court.

23 Finally, the United States seeks an order continuing the
24 Court's jurisdiction for such other and further relief as may
25 be just and proper.
26
27
28
29
30
31

V

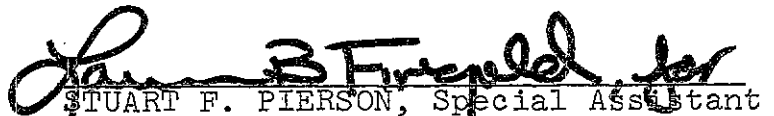

CONCLUSION

The pleadings indicate that the Game defendants and the Fisheries defendant will present contradictory positions. The Game position is clearly wrong as a matter of law where its actions and the true meaning of its "fair share" interpretation are viewed in a factual context.

After many years of prosecution and harassment of treaty Indian fishermen, the record in this case should clearly expose the invalidity of State regulation of off-reservation fishing. A comprehensive and detailed decision will serve the dual goals of finally protecting the Indians rights and resolving a troublesome public dispute.

DATED this 14th day of August, 1973.
