A new look: The Law Review has switched to desktop publishing. This allows us to produce the entire book in-house, except for printing and mailing. This switch has also led to a slightly new look for the Review. The typeface is crisper, we reorganized the cover, and we revised our citation style, forgoing a few of the Bluebook’s less attractive and less useful rules. We hope that our readers find these changes helpful, and we thank those alumni and friends who made the switch possible through their generous donations.
